

The “bomb cyclone” has arrived. A major winter storm is bearing down on the East Coast, bringing heavy winds, snow, and ice, followed by bitter cold. We’re tracking the latest:

A monster nor’easter exploded off the East Coast, slamming the Tri-State from the Jersey Shore to Long Island, bringing the potential for up to a foot of snow and triggering winter storm and blizzard warnings across the New York City region.

As the storm slams the area, the snowfall totals in the AccuWeather forecast have gone up.
