

I was glad to hear on the plans to rebuild, re-surfaced and upgrade others, more in the rural communities. The Prime Minister announced today that some \$90 million dollars will be spent on roads mainly in the countryside and constituencies of the ruling party.

I am still listening to hear a single island in the Grenadines mentioned. I was glad to hear the announcement on road improvements and hoping to hear the main road from LaPompe to the JF Mitchell Airport mentioned for refurbishment and expansion. That was not the case and I am wondering why Bequia was neglected?

I have an answer and I hope that the Honourable Prime Minister is reminded that Bequia is an integral part of St. Vincent and the Grenadines. The bias is too plain and I am wondering how the Prime Minister wants investments in Bequia and the main vein of communication is neglected to the point that a section of the road will soon be impassable.

There has been no rebuttal by the Opposition and the representative of the people of Bequia and Mustique. Are we gonna wait to hear a statement when the Prime Minister speaks again at another forum to mention the Grenadines when it nears the next General Elections?

We the people of Bequia demands road improvements from the loan/funds announced by the Prime Minister for road improvements. We want our full share of that money.

I want you to know that I will be a thorn in the established political parties in St. Vincent and the Grenadines when the elections are called.

I am going to contest the next elections as an Independent and my symbol is the **FORK**

**VOTE GODFREY GREGG**
